

Dear FTI group members,

I am really sorry to be missing our first group meeting and, above all, the Secret Santa.

I would like to thank you very much for the continuous support that you let me feel everyday and the very nice *ambience* that you contribute to create in our work environment!

*Thank you and see you soon!*

50 RESULTS

## CERN teams up with Luxembourg and the World Food Programme to tackle global hunger

The new partnership aims to leverage state-of-the-art AI technology to speed up progress towards a world with zero hunger

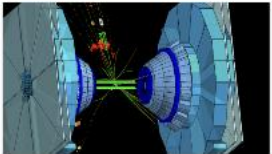

News | Computing | 15 October, 2024

## How CERN IT keeps up with the data deluge

At CERN we are used to dealing with a deluge of data, but the numerical value behind the word "deluge" has significantly evolved over the years

News | Computing | 04 September, 2024

## Digital archaeology: new LEP data now available to all

Retrieving and preserving access to data from experiments that ran in the 90s is a complex task carried out by passionate experts in the IT department

News | Computing | 15 July, 2024

## CERN welcomes International Year of Quantum Science and Technology

On the centenary of quantum mechanics -- the bedrock of particle physics and enabler of numerous technologies -- CERN is contributing to the development of a new generation of quantum technologies for fundamental research and beyond.

News | Knowledge sharing | 12 June, 2024

## The next-generation triggers for CERN detectors

The recently launched Next-Generation Triggers project is set to remarkably increase the efficiency, sensitivity and modelling of CERN experiments

News | Computing | 11 April, 2024

## A new data centre at CERN

The new data centre complements the existing centre and will allow CERN to respond to the growing data-processing needs of the worldwide scientific community

News | Computing | 23 February, 2024

## Indico: 20 years of event managing

The CERN-developed open source software, Indico, is being chosen by a growing number of users worldwide. As it celebrates 20 years, find out what new features are planned for 2024

News | Computing | 28 February, 2024

## Ethical, open and non-commercial: the Open Web Search project is designed to provide Europe with the right alternative to existing search engines

CERN recently hosted the fifth International Open Search symposium, where over 100 experts discussed how to make searching the web in Europe fairer and safer

News | Computing | 06 December, 2023

## Serbia joins the Worldwide LHC Computing Grid

On 9 December, CERN and Serbia signed a Memorandum of Understanding (MoU) at the Serbian State Data Centre. The centre will become a Tier1 member of the Worldwide LHC Computing Grid (WLCG), the highest level of collaboration within the Grid

News | Computing | 14 December, 2023

## CERN and the World Food Programme sign a memorandum of cooperation

The collaboration between the two international organisations will promote access to and use of breakthrough innovations in the field of IT to fight hunger worldwide

News | Computing | 14 November, 2023

## Heard about quantum technology? Now it's time to understand it!

Quantum technology is among the biggest talking points on the web. And yet, the general feeling is that only experts can understand it. The Sparks! Forum at CERN aims to prove this wrong

News | Knowledge sharing | 01 November, 2023

## Bringing quantum computing to society

A new, three-year CERN-based programme called the Open Quantum Institute seeks to make quantum computing resources and technical expertise widely available

# Exciting 2025 ahead!

## **This will happen:**

- Complete upgrade of the IT Visit experience
- IT Standard presentation
- Ensure readership stats improve
- Ensure regular coverage of IT content

## **Will the following happen?**

- IT New website
- New exhibit(s) on Quantum in SG finalised
- New exhibition installed

# More to come...

This was short!

I will be happy to share more detailed news and updates at the next group meeting, which I am looking forward to!

Thank you for your understanding.
