HL-LHC TDE Preliminary Design Review

Contribution ID: 13 Type: not specified

Cooling system simulations

Tuesday 11 March 2025 16:10 (40 minutes)

Overview of cooling system studies completed and conclusions for HL design.

- Requirements
- Description of current operational cooling system and limitations
- Benchmarking of run 3 model
- Detailed simulation setup
- Performance comparison of different upgrades and implications for operation
- Feasibility of different options, comparison in terms of work needed, integration issues, cost, RP issues.
- Conclusion on proposed configuration

Presenter: BINDA NOTARIANNI, Giovanni (ETH Zurich (CH))
