

## EPPS

### Updated plans

- 11/12** Complete first draft of evaluation report - start of internal review by editing team
- 16/12 Interim presentation to CERN management
- 20/12** First draft of R&D text  
Feedback from editorial team on evaluation report
- 20/01** R&D programme finalised - start of internal review by editing team
- 01/02 Feedback from editorial team on R&D  
Presentation of plan to Steering board
- 24/02** LDG review  
Distribution of report to collaboration (if possible, earlier)
- 01/03 Complete draft submitted to Advisory Board

Dear Christophe, Donatella, Federico, Jenny, Jim, Michelangelo and Paul,

in order to allow for a comparison of the physics potential between various proposed collider projects at CERN, the PPG group has defined a set of benchmark processes / measurements for different physics areas. The list of benchmarks is given in the attached file. It is expected that in the submission of your input to the Strategy by 31 March these benchmarks are addressed (as far as they are relevant for your project).

However, before finalising them, we wish to give you the opportunity to send feedback to the conveners of the respective physics area with :cc to us (Strategy Secretariat). The co-conveners of the physics groups are also indicated in the attached file, or they can be found here: <https://europeanstrategyupdate.web.cern.ch/physics-preparatory-group-ppg>

Please send any feedback you may have by Wednesday next week, 11 December. Please also forward the questions of the detector requirements to the respective contact person in your project.

Best regards,

The Strategy Secretariat (Karl Jakobs, Hugh Montgomery, Dave Newbold, Paris Spicas) and the PPG Working Group co-conveners

# MuCol deadlines

## January 24<sup>th</sup> Technical report of MuCol period 1

### 1.2. EXPLANATION OF THE WORK CARRIED OUT PER WP

[Include a table or description of how the project has achieved each objective of the period.]

Explain the **work carried out** in your WP during the reporting period, giving details of the work carried out by each beneficiary/affiliated partner involved. *(about ½ page per Task)*

Lead Beneficiaries:

T1: UNIPD

T2: DESY

T3: INFN

#### 1.2.1. WP2: Physics & Detector

[Add text here]

##### 1.2.1.1. **Task X.X: XXX** (Lead Beneficiaries)

[Add text here]

# MuCol deadlines

**January March<sup>31st</sup>**

Workshop on detector design and physics performance with a public lecture on Muon Collider
