

II WORKSHOP ON DIFFRACTIVE PHYSICS AT THE LHC

Wednesday 21 September 2011 - Friday 23 September 2011

CBPF - Rio de Janeiro

Book of Abstracts

Contents

Opening 1	1
Exotic quark production at LHC in the minimal supersymmetric 3-3-1 model 3	1
Extra dimensions searches in central exclusive production 4	1
First results from the TOTEM experiment at the LHC 6	1
Elastic differential cross section at 7 TeV and dynamical gluon mass model predictions 7	1
Latest results from the Pierre Auger Observatory 8	1
Exclusive production of exotic mesons at the LHC 9	1
Diffraction at CMS 10	1
Anomalous coupling between photon and W/Z boson and the AFP project 11	2
An eikonal approach for inelastic pp/ppbar collisions 12	2
Tomography of pp and ppbar scattering 13	2
Absorptive effects at LHC: the triple-Pomeron vertex scenarios 14	2
Diffraction at HERA, Tevatron and LHC 16	2
Central diffraction in ALICE 18	2

1

Opening

3

Exotic quark production at LHC in the minimal supersymmetric 3-3-1 model

4

Extra dimensions searches in central exclusive production

6

First results from the TOTEM experiment at the LHC

7

Elastic differential cross section at 7 TeV and dynamical gluon mass model predictions

8

Latest results from the Pierre Auger Observatory

9

Exclusive production of exotic mesons at the LHC

10

Diffraction at CMS

11

Anomalous coupling between photon and W/Z boson and the AFP project

12

An eikonal approach for inelastic pp/ppbar collisions

13

Tomography of pp and ppbar scattering

14

Absorptive effects at LHC: the triple-Pomeron vertex scenarios

16

Diffraction at HERA, Tevatron and LHC

18

Central diffraction in ALICE
