INDICO: A COLLABORATION HUB

CHEP 2012 — NEW YORK

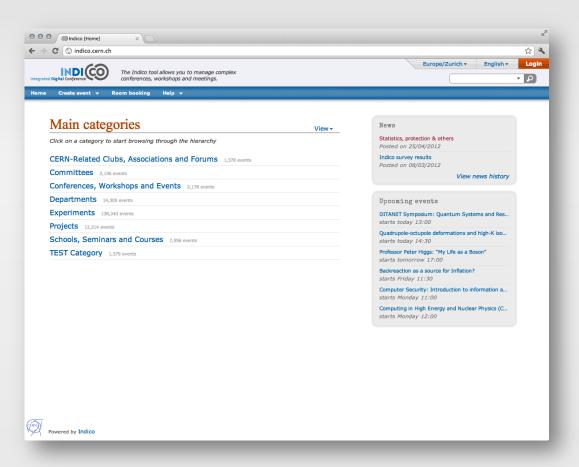

PEDRO FERREIRA INDICO TEAM / CERN

WHAT IS INDICO?

An event management web application.

WHAT IS INDICO?

An event management web application

Conference Lifecycle

Room Booking

Data Repository

Collaborative tools

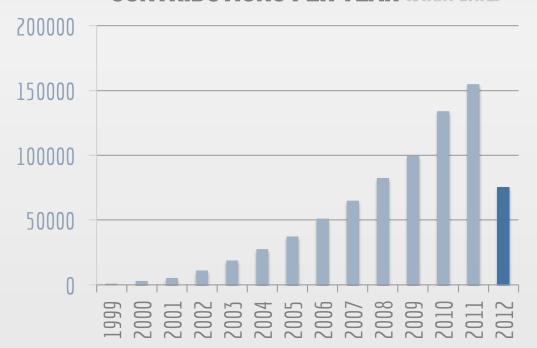

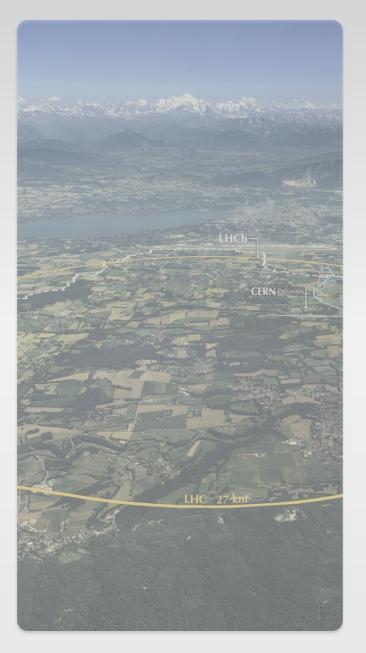

Developed at CERN - Free and Open Source

AT CERN

- ~ 180.000 events
- ~ 700.000 contributions
- ~ 1.000.000 files

CONTRIBUTIONS PER YEAR (START DATE)

AROUND THE WORLD

Indico is the *de facto* HEP standard collaboration tool

Growing Community

- 4 Continents
- > 100 known servers

LAST TIME...

CHEP 2009 - "Indico Central"

Indico 0.97 was coming out
Biggest change in Indico to date
Integration with Collaborative tools

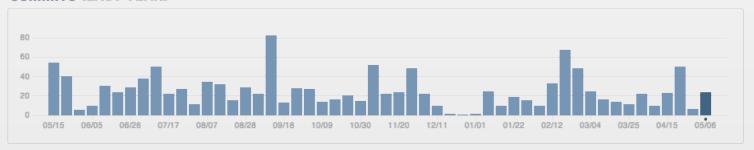

NOW

Indico is currently in version 0.98.2

0.99 is around the corner

Version 1.0 should be out by the end of the year

COMMITS (LAST YEAR)

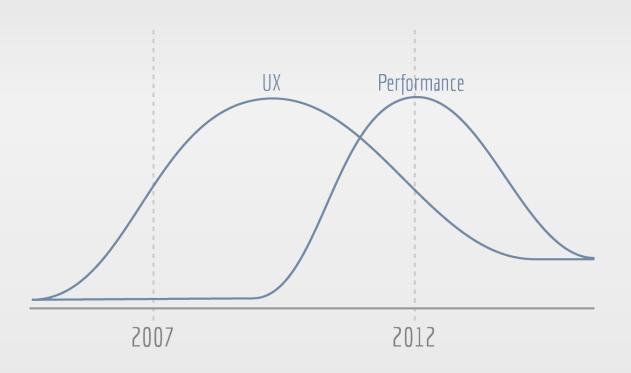

WHAT HAS CHANGED?

SHIFTING PRIORITIES

A bit less UX, more performance

FEATURE SET

New features since 0.97

Integration with Collaborative Tools

Room Map

Paper Reviewing

Timetable Drag'n'drop

Per-event Statistics

Real-time search updates

HTTP API

Security Improvements

COLLABORATIVE TOOLS

Integration with videoconferencing, recording and chat

tools

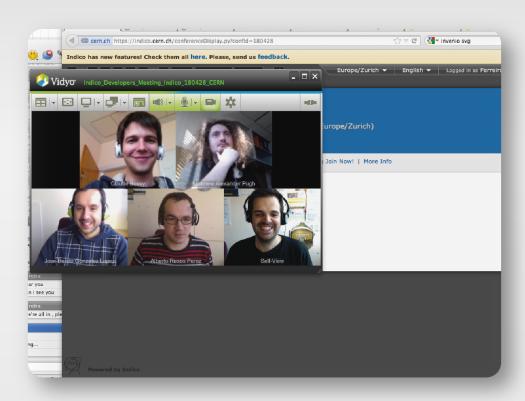

Vidyo

Recording/webcast request

CERN MCU

EV0

XMPP/Jabber

HTTP API

Accessing structured information in an easy and secure way

http://indico.cern.ch/export/event/149557.json?ak=xxxxxxxxx

```
"count": 1,
"additionalInfo": {},
"_type": "HTTPAPIResult",
"complete": true.
"url": "https:\/\indico.cern.ch\/export\/event\/149557.json?ak=xxxxxxx&pretty=yes",

                "affiliation": "Unknown",
                "_fossil": "conferenceChairMetadata",
                "fullName": "Ernst, Michael",
                "email": "mernst@bnl.gov"
```

HTTP API

The Swiss Army Knife for the Indico Community

Easy to use (HTTP-oriented)

Secure – several configuration modes

Allows access to most event metadata

Events, contributions, sessions, file URLs, bookings

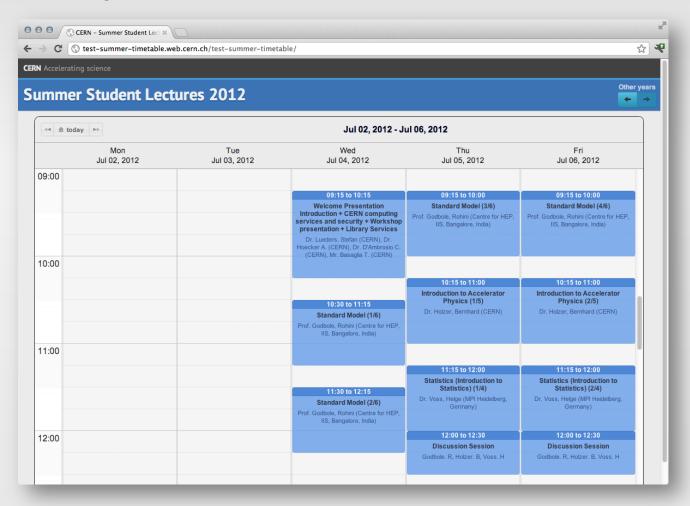

Several formats (XML, JSON, iCalendar, Atom, JSONP)

Allows people to build applications on top of Indico

Example - Conference4Me

HTTP API

Example: Summer Student lecture timetable

SECURITY

Security is an essential topic in modern web applications

Full HTTPS mode – logged in users

Protected events excluded from iCal/Atom feeds

Access key/signature authentication mechanism (HTTP API)

HTML sanitization, XSS prevention

Protection status displayed for protected pages

USER EXPERIENCE

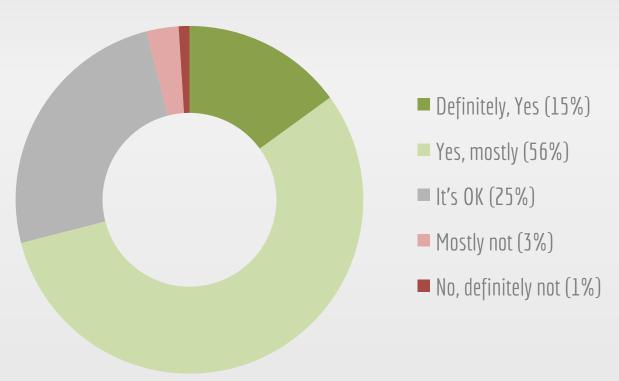

Since 2007, we've been actively conducting usability tests

UX is **not** a secondary question
Several testing methodologies
"Lab tests" in 2007 and 2012
Real users, a computer and a camera

USER EXPERIENCE

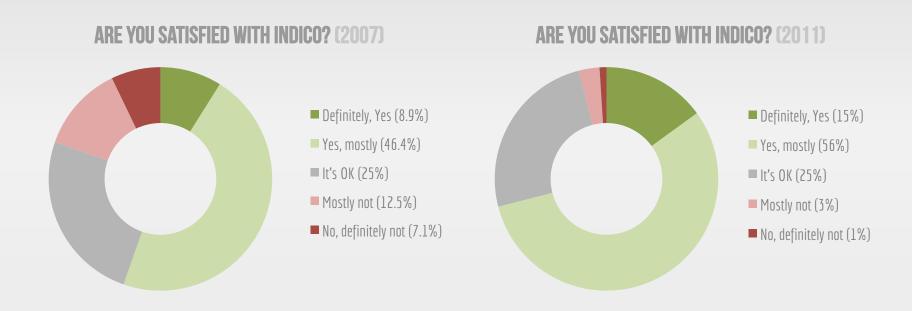

And we haven't been doing too bad...

ARE YOU SATISFIED WITH INDICO?

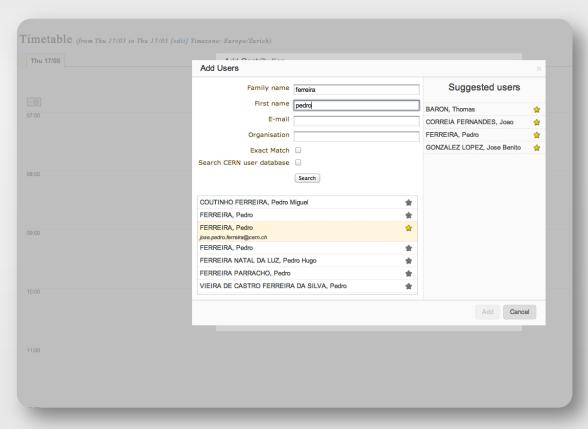

USER EXPERIENCE

A clear improvement, but we can do even better

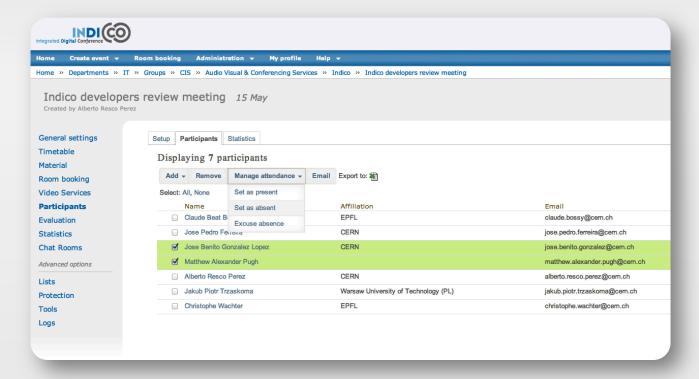

Small things can make a lot of difference

User search pop-up everywhere

Small things can make a lot of difference

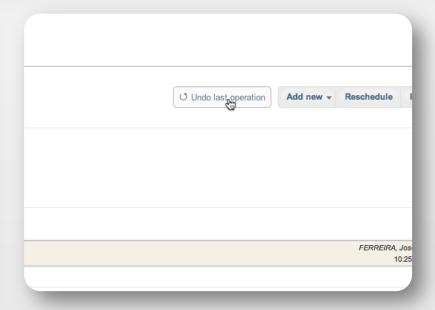

Nicer, more functional listings

Small things can make a lot of difference

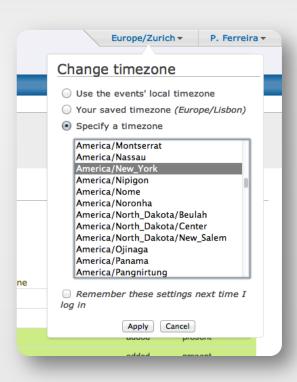

Drag'n'drop Timetable

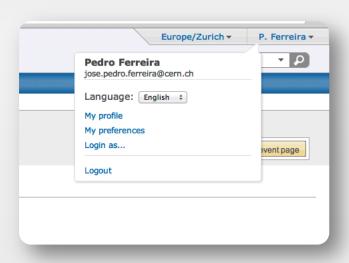

Small things can make a lot of difference

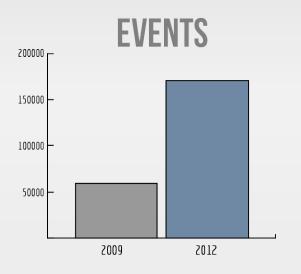

Integrated profile bar

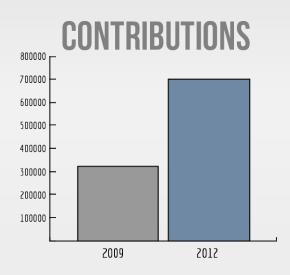

PERFORMANCE

Because we can't afford being slow.

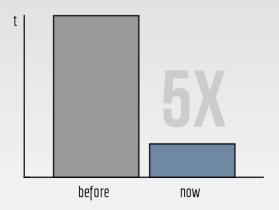

PERFORMANCE

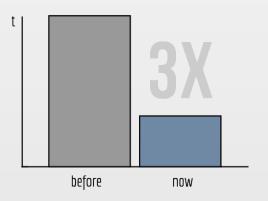

Optimizing "slow spots".

Event List Event Pages Event Overview / Calendar Room Booking module Abstract management PDF creation Registrant List **Contribution List**

EVENT OVERVIEW

BOOKING CALENDAR

PERFORMANCE

Using technologies the right way.

Minimizing the number of database commits

New caching mechanism with memcached support

Bookings (258):

6-2-008	6	8	10	12	14	16	18	20	22	24
6-2-024 (BE Auditorium Meyrin)	6	8	10	12	14	16	18	20	22	24

TECHNOLOGIES

Doing more, writing less code.

Python 2.6 +

WSGI

Mako templating engine

jQuery & friends

Babel (i18n)

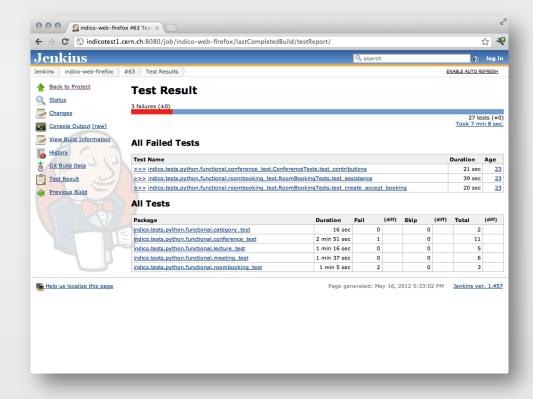

jQueryUI, Google Maps, webassets.py, memcached, pypdf, pyatom, icalendar ...

QUALITY ASSURANCE

Developers fail but software can't

Unit tests

Functional (interface) tests
Integration server

THE FUTURE

1.0

Is coming out this year

Lots of refactored code

Cleaning up some "dusty corners" – improving design/usability

UX improvements (Drag'n'drop Registration form...)

A Uniform, stable and complete Software Project

INDICO MOBILE

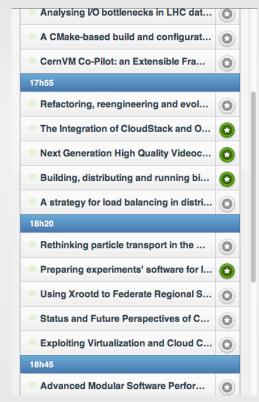

An improved interface for mobile devices

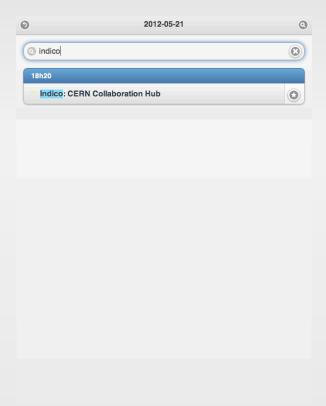

A mobile add-on for Indico
Currently in development
Usable version by the end of the year
Powered by Indico's own HTTP API

INDICO MOBILE

An improved interface for mobile devices

BEYOND 1.0

We have come a long way since CHEP 2004

Paper Reviewing brought us closer to our objectives

Finishing the Conference Lifecycle coverage - proceedings

"My Indico" - better homepage?

The web keeps evolving towards something ubiquitous...

We want to be a part of it!

TAKE PART!

Indico is Open Source and free to use

You can help us make it better.

We are open to suggestions and code contributions!
