Enhancing User Engagement in Indico with Push Notifications

Tuesday 6 May 2025 10:05 (10 minutes)

Push notifications offer a powerful way to keep users **informed** and engaged with Indico events, abstracts, and workflow updates (**moderations - approved, checked-in**). This feature will allow users to subscribe to relevant notifications, such as abstract reviews, session changes, and important updates like ***new events in their favorite category***. By integrating a flexible subscription model, users can choose the type of notifications they receive, ensuring a personalized and efficient experience.
