glexec update

Wednesday 27 September 2006 17:10 (20 minutes)

About glexec, SAZ and GUMS interaction in OSG; about how it works for them, deployment issues

About glexec in general and our plans in the very near future and where we stand today

That last detail can also go into the Site Admin worries about glexec and how we wish to give deployment solutions.

The VO Naming concept in the GGF sense with the work in the GIN group.
