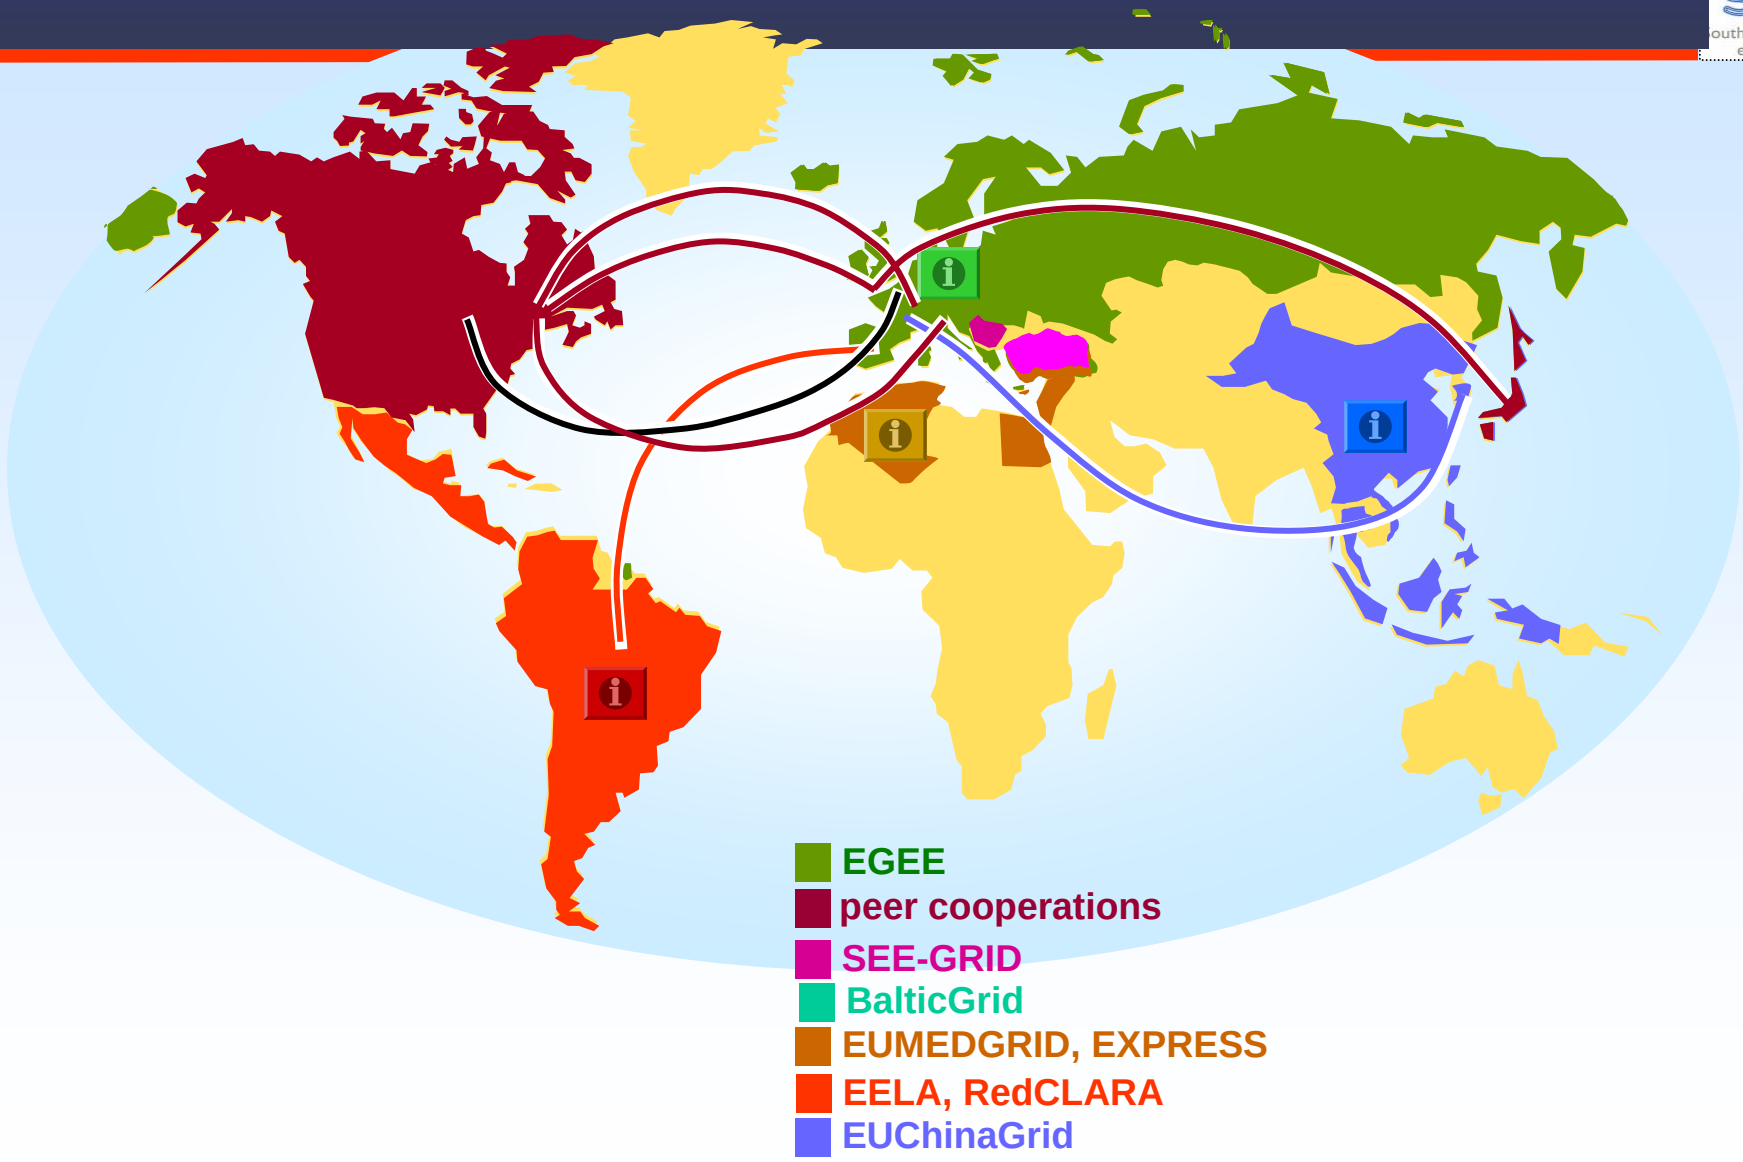
Regional Grid projects concertation workshop

The SEE-GRID-2 initiative is co-funded by the European Commission under the FP6 Research Infrastructures contract no. 031775

Grids: regional expansion

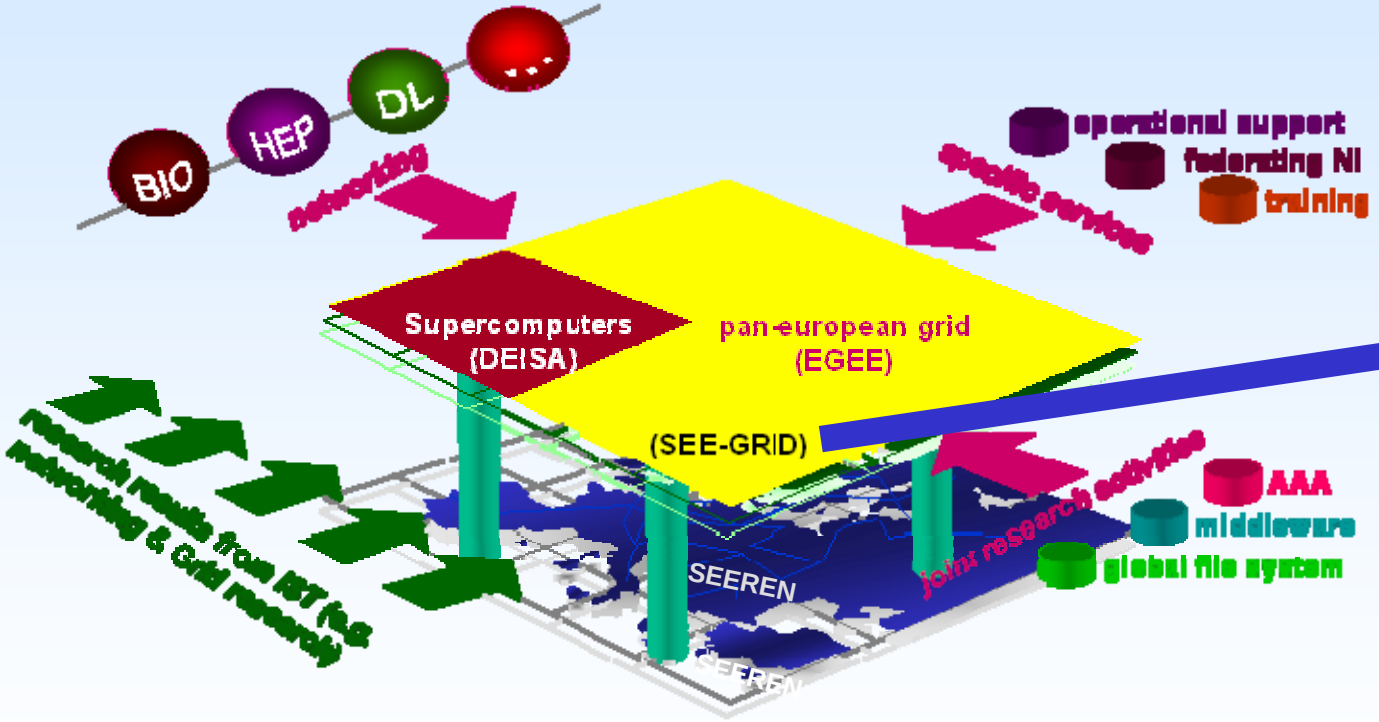
SEE-GRID
South Eastern European GRid-enabled eInfrastructure Development



The SEE-GRID-1 initiative

SEE-GRID
South Eastern European GRid-enabled eInfrastructure Development

Contribute to building a worldwide Infrastructure by expanding the “eInfrastructure inclusion” into South-East Europe



> http://www.see-grid.org

SEE-GRID-2: new directions

- Policy-focused deployment strategy
  - SEE-GRID-2 is the next step towards SUSTAINABLE Grid-related ACTIVITIES (NOT just infrastructure!) in the SEE region
  - Shift priority from a "top-down" approach (i.e. from regional project execution to national implementation) towards a a "bottom-up" approach (from national priorities, cooperation, and innovation to regional cohesiveness)
  - Strong NGI support → seeking government commitment
- Growth of infrastructure: regional and country-level
- Application-driven deployment approach
  - Diverse and multi-disciplinary communities
- Liaisons and exchange of know-how with related projects

Aims of concertation workshop

- Exchange of experiences in infrastructure, applications, training approaches between regional projects
- Identifying common and complimentary practices
- Start drafting recommendations for best practices

Recipe for regional success?

- Carrying out complementary but coordinated actions
- dissemination and training → pilot infrastructure → pilot applications →
- With longer term sustainability as the main goal

Workshop: agenda and format

- Infrastructure & operations, Moderator: Per Oster
- Applications: deployment approach, Roberto Barbera
- Training, Peter Kacsuk
- Short presentations per project + panel for each

- Panel: "Coordinated actions towards Sustainability" - Aleksandar Belic

- Recommendations
