Design of large aperture separation dipoles D1

Thursday, November 17, 2011 11:30 AM (30 minutes)

Present status of design. Discussion of the main choices: margin and coil width. Analysis of the Nb₃Sn conceptual design - is it viable or should we go to Nb-Ti? Fringe fields and anticorrection coils for the 180 mm case.

Presenters: XU, Qingjin (High Energy Accelerator Research Organization (JP)); NAKAMOTO, Tatsushi

Session Classification: IR Magnet Topics - 17 Nov (AM)
