Making the most out of your OSS contributions

Friday 21 February 2025 15:00 (1 hour)

Navigating open source projects can be a challenge for both new and experienced contributors. This talk will cover contribution best practices that will help new contributors get started while also helping experienced contributors improve their interactions with open source projects. We'll discuss how to use metrics from the CHAOSS project to consider the health of the external projects you contribute to and identify areas that might indicate that a project is at risk of becoming unviable in the future. But the advantage of working in open source is that we can identify potential risks and work within projects to make them more viable, and this talk will discuss how to improve projects from within. By the end of this talk, you'll have learned tips and tricks for becoming an even better open source contributor.

Presenter: Dr FOSTER, Dawn (CHAOSS Project)

Highlighting Contributions to Open Source Projects

Friday 21 February 2025 16:00 (1 hour)

Discover the diverse open-source contributions made by members of the CERN community! In this session, speakers will share their experiences working on projects that are not directly managed by CERN, showcasing the broader impact of their work and inspiring others to get involved.

Authors: Dr WIEBALCK, Arne (CERN); ELSON, Philip (CERN); OULEVEY, Thomas (CERN); ROUN, Tomas (CERN)

Presenters: Dr WIEBALCK, Arne (CERN); ELSON, Philip (CERN); OULEVEY, Thomas (CERN); ROUN, Tomas (CERN)

Mini Hackathon for Open-Source Contributions

Friday 21 February 2025 17:00 (1 hour)

Whether you're new to open source or a seasoned contributor, join us for a hands-on mini hackathon focused on making real contributions to open source projects. Together we can look at different ways to engage with projects, collaborate with peers, and gain practical experience. Bring your laptop, a collaborative spirit, and enthusiasm for a project to which you want to contribute!
