SND EYETS 24-25 schedule

- VIC organized on February 10th
- Minutes of the VIC: [3234746](#)
- **Points clarified:**
 - Transport of the 200kg block EN-HE – EDH submitted,
 - Gas bottle will be placed in the flat area in UJ18 and there are already holes for it,
 - Total volume and pressure of the gas bottle, chemical composition inside, relace rate in LHC tunnel, number of gas bottles,
 - Safety aspects during the transport and installation of MDT.

SND EYETS 24-25

- Last week (W7) – Measurements taken for cabling and DS3-4 planes removed and mechanics to allow the removal of the iron block,
- Wednesday 19th February the transport service removed the iron block,
- IMPACT: [248210](#)
- EDH for handling: 10855276

SND EYETS 24-25

- ECR is submitted and under circulation,
- For the gas bottle Domenico Dattola will install the holders that will be placed in UJ18,
- Next week (W10) – transporting mechanics and MiniDT to IP1,
- All things will be moved to surface area in the week of Feb 24th,
- Installation of the detector will be on the March 3rd.
