

Carrier Class Expectations concerning White Rabbit Development

Thursday 26 June 2025 11:00 (10 minutes)

This short talk will cover WR features needed for guaranteeing a high standard of reliability and availability in telecom applications, such as an enterprise approach to network calibration during the network lifecycle. The presentation will also introduce the concept of VTTNs (Virtual Time Transfer Networks) and their pivotal role in resilient distributed timescales using WR.

Presenter: BRAWAŃSKI, Marek (Orange Polska)
