

The Problem

Python is popular
It's also slow
That creates a
green compute problem

The Reality

Compiling Python
for real-world software
sounds straightforward
until you try it

How we do this

Experience is the fuel
We turn it into
a living guidebook

CompilePython.com

*TripAdvisor for
Python compiler tools*

What actually works
in practice

Lightning Camps

Short, focused reports from
real projects and real people
Signal, not noise

What this is

A knowledge commons
for what actually works

Outcomes

Faster decisions
Less wasted effort

Get involved

Bring your project
Share what worked
(or didn't)
