

WP 3: IASA/TUD

Different communities to be integrated effectively to form the virtual Users Community)
INTEGRATE THE COMMUNITIES
 (researchers, students, educators)

Galileo	teach	5,000
Masterclasses	stud	6,000
COSMOS	teach	3,000
DSPACE	teach	1,000
NSO	Std+teac	1,150
LA@CERN	Std+teac	500
Hands on Universe	teach	~300
Faulkes telescopes	Std+teac	100

Figure 2.3: The Discover the COSMOS coordination action aims to create a large virtual education community by integrating effectively teachers and students from already existing, and well established communities of practice in the fields of Astronomy and Particle Physics. The members of communities are already involved in eScience activities in the framework of European and national projects and initiatives.

Deliverables

Deliverable Number ⁸¹	Deliverable Title	Lead beneficiary number	Estimated indicative person-months	Delivery date ⁸⁴
D3.1	Users Profiles and Task analysis	EA 10	5.00	3
D3.2	eScience in Secondary Schools Future Challenges Report	TUD 8	4.00	8
D3.3	Guidelines and Supporting Materials for Teachers and Outreach groups	UoG 5	4.50	8
D3.4	Discover the COSMOS Communities Support Environment	IASA 1	3.50	4
D3.5	Discover the COSMOS Communities Support Environment	IASA 1	3.50	12
D3.6	Discover the COSMOS Communities Support Environment	IASA 1	3.50	24
Total			24.00	

All 15 partners participate but IASA, UoG, TUD, and EA have 3 or more personmonths

□ Users = teachers, teacher's trainers, students, curriculum developers, parents, researchers, policy makers

- **Support environment** -> means to engage users (on-line questionnaire), provide tool-kits, 1st version -> use initial workshops and existing portals
- **Workshops** (will be organized in 3 cycles in every participating country-see table)

Indicative Number of Workshops/country

Country	Visionary (M3-M8)	Practice Reflection(M12, M18)	Summative (M20-M24)
Germany	2	4	1
Greece	2	4	1
UK	2	4	1
Spain	2	4	1
Switzerland	2	4	1
Austria	2	4	1
France	2	4	1
Portugal	2	4	1
USA	2	4	1

- Have to start immediately!!!!
