

Some thoughts on WP 4 - IMPLEMENTATION

Rolf Landua & Emmanuel Tsesmelis

CERN

TASKS

WP 4.1 Development of implementation plan (5 months)

- Methodology
- Practical guide of action (during pilot implementation/validation)
- Defines all types of project activities
- Defines mechanisms to monitor, guide, support participants

PILOT ACTIVITIES

- Initial planning and coordination performed centrally at CERN
- Later managed locally

TASKS

WP 4.5 Large Scale International Implementation Activities

CERN

- International High School teacher course (3 weeks in Summer)
- National Teacher courses (20-25 one-week courses, all year)
- School visits (30,000+ school students per year)
- CERN school lab (15,000 school students per year, from 2012)

INTERNATIONAL CONTESTS FOR TEACHERS AND STUDENTS

- provide data from CERN detectors
- provide virtual visits to CERN, animations, simulations
- provide other eScience applications

The CERN Education Group will employ a COSMOS/CERN project manager.

The project manager will help to develop the implementation plan and will coordinate the large-scale international implementation activities
