## Baryonic B decay results from BABAR

*Wednesday 28 March 2012 17:12 (18 minutes)*

Decays of B mesons into final states containing baryons are much less understood than decays into mesons, and are useful for shedding light on baryon-production mechanisms and intermediate states. We report the results of recent and new studies of such decays, including  $B^- \rightarrow \Sigma_c^{++} \bar{p} \pi^- \pi^-$ ,  $B^0 \rightarrow \Lambda_c^+ \bar{p} \pi^+$ , and  $B \rightarrow D^*(\pi) p \bar{p}$ . Both the total decay rates and the resonant structure are reported.
