Photon Results from CDF

Tuesday 27 March 2012 09:20 (20 minutes)

Prompt isolated photon pairs production cross sections, as well as direct photon production in association with a heavy (b or c) quark jets are presented. Differential cross sections are presented as a function of several variables. The results are compared with a next-to-leading order perturbative QCD calculations.

Session Classification: Hadronic final states

Track Classification: Hadronic final states
