

Session Program

Mar 26 - 30, 2012

XX International Workshop on Deep-Inelastic Scattering and Related Subjects

***Combined: Diffraction and vector mesons/
spin physics***

University of Bonn, Wolfgang Paul Lecture Hall
Kreuzbergweg 28, 53115 Bonn, Germany,

Wed, March 28

1:30 PM

Combined: Diffraction and vector mesons/spin physics

Session | **Location:** University of Bonn, Lecture Hall, Institute for Physical Chemistry

1:30 - 1:55 PM **Imaging partons using exclusive scattering processes**

Speaker

Markus Diehl

1:55 - 2:15 PM **GPD analysis of hard scattering processes : progress report**

Speaker

Hervé MOUTARDE

2:15 - 2:35 PM

Spin structure of the "forward" nucleon charge-exchange reaction $n + p \rightarrow p + n$ and the deuteron charge-exchange breakup

Speaker

Dr Valery Lyuboshitz

2:35 - 2:55 PM **Overview of Deeply Virtual Compton Scattering at HERMES**

Speaker

Morgan Murray

2:55 - 3:15 PM **Vector Meson Production and DVCS at CLAS and CLAS12**

Speaker

Dr Daria Sokhan

3:15 - 3:35 PM

Hard Exclusive Meson Production at COMPASS and Future DVCS Measurements at COMPASS-II

Speaker

Heiner Wollny

3:35 PM
