

Compute and Accelerator Forum / EVERSE Network Introduction

Graeme Stewart, for all of the C&AF and EVERSE organisers

2025-06-11

Welcome!

Welcome to this special edition meeting that is jointly organised between the **Compute and Accelerator Forum** and the **EVERSE Network**

- We organised this interesting topic in this way as it is of mutual interest and helps two communities get to know each other
- Compute and Accelerator Forum is a regular meeting series on technical topics for performant computing
 - We have [regular meetings](#) and you can join our [mailing list](#)
- [EVERSE](#) is an EC funded project to improve the recognition and quality of research software
 - The [EVERSE Network](#) is a broader group, including our project members and interested individuals and organisations
 - You can join the [EVERSE Network](#) and participate in our [activities](#), such as the [RSQKit](#)

Today's Meeting

- Today we will have a presentation on *Julia and GPUs for fun and profit* from Valentin Churavy, University of Augsburg
- NGT - Openlab "Optimising Floating Point Precision" Workshop, 1-2 July
 - <https://indico.cern.ch/e/floatworkshop>
- For future meeting topics, please check Indico for [C&AF](#) and the [EVERSE Network](#)
 - We have a C&AF seminar on auto-differentiation planned for September
 - On the EVERSE side we're planning a meeting with the African RSE community and presentations on the RSQKit and EVERSE science pilots
- If you have a suggestion for a meeting topic please contact:
 - contact@everse.software
 - compute-accelerator-forum-organizers@cern.ch
