

## Catalysing Impact - Superconductivity for Global Challenges

Contribution ID: 39

Type: **not specified**

### **Keynote: Private Investment: What attracts venture & long-term capital?**

*Monday 1 December 2025 17:00 (15 minutes)*

While both private and public investment has allowed superconductivity and its applications to substantially grow, more support is needed for the technologies to address pressing societal problems. This session will discuss how public and private investment structures shape superconductivity development, covering national priorities, institutional and venture capital focus areas, and the vehicles driving deep-tech growth.

**Presenter:** Mr BEIGBEDER, Charles (Audacia)

**Session Classification:** Day 1
