

## **First Thoughts on MD Priorities for 2012**

In 2012, a total of 22 days of beam time will be allocated for MDs. Three primary MD themes are identified: (1) pushing performance in 2012, (2) preparing for 2014/15, and (3) towards maximum luminosity. Example topics include emittance growth in collision or enhanced satellites for theme (1), 25 ns operation for (2), and ATS optics for (3). Structured lists with many further MD requests and topics for each theme as well as some initial thoughts on the MD priorities will be presented.
