

Injection losses and protection, de-bunching, availability, sunglasses

Monday 12 December 2011 16:40 (25 minutes)

Injection losses are compared for 2010 and 2011 operation. Mitigation techniques which were put in place in 2010 to reduce losses at injection are described. Issues in 2011 operation, their potential improvements, the experiments' view on beam quality at injection and the performance reach for 2012 are shown.

Presenter: BARTMANN, Wolfgang

Session Classification: Session 3: Injection
