## X-band Technologies

- X-band RF structure High Power Testing (TESTING)
- Creation and Operation of X-band High Power Testing Facilities (TEST AREAS)
- Basic High Gradient R&D (HIGH-GRADIENT)

# IFIC, Valencia Test Infrastructure

**CLIC Collaboration Working Meeting, 2012-16 Work Packages** 

**3-4 November 2011** 

S. Verdú-Andrés on behalf of IFIC, GAP (Group of Accelerator Physics) http://gap.ific.uv.es
Valencia, Spain

► The European Space Agency (ESA) and the Val Space Consortium (VSC)

(= Universitat de València Estudi General (UV) + Universidad Politécnica de Valencia (UPV) + City Hall of Valencia + Valencian Regional Governement)

High Power RF Space Laboratory is the ESA Laboratory especialized in:

- RF breakdown phenomena (Multipactor, Corona and power handling)
- Passive Inter-Modulation (PIM).

- ► The IFIC Group of Accelerator Physics (GAP) is participating in:
  - development of medical accelerator structures (cyclinacs in S and C-bands, PARTNER project)
  - measurement and data analysis of high-gradient structures at KEK and CTF3 (in collaboration with CLIC RF group)

Strong willingness to join efforts of both communities,

Accelerators and Space Communications,
in the study and measurement of RF structures and associated phenomena.

RF breakdown & multipactor study, surface characterization (electronic microscopy, XPS-UPS, SEM), outgassing, nano-layer growing techniques, surface backing, etc.

- creation and operation of X-band high-power testing facility (high-gradient test stand in X-band (9.3 GHz))
- X-band RF structure high-power testing

## **Equipment**

#### **EXISTING EQUIPMENT**

- 5 high-vacuum chambers (min. press. 10-8 mbar),
- Power amplifiers from 435 MHz to 30 GHz
- Several spectrum analyzers, network analyzers, ...
- Waveguides, directional couplers, cables, attenuators, circulators, isolators, bolometers and others
- Multichannel multipactor station, unique in the world
- Electron sources: electron gun, 90Sr, Hg ultraviolet sources
- XPS-UPS, SEM, electronic spectroscopy
- Evaporation system for layer growing and outgassing studies
- 2 clean rooms class 10000 (equivalent to ISO 7)
- mechanics & electronics workshop (2D and 3D metrology system)

#### TO BE FUNDED

9.3 GHz pulsed klystron: 6 MW peak, 6 kW average

### **Collaboration Info**
