

ALEPH2EDM4hep news

1994 new dataset has been translated and is available on EOS

- /eos/experiment/aleph/EDM4HEP/DATA/1994_old/LAST
- Containing new information compared to the already existing file
 - dE/dx, covariance matrices, beam energy, ...
- Allowing users to select events by class
 - e.g. hadronic events, leptonic events, ...
- Waiting for feedback from people who are trying to use them
- Interest is growing: going to organize a “tutorial” for a couple of TH/FCC summer students working on analysis

Simple interface to query the database is ready and available on EOS

- Now introducing a way to output the path of the selected files in a .txt used by FCC Analysis to load the list of files to be analyzed
