

## Welcome to the 4<sup>th</sup> DRD3 collaboration week

from Amsterdam to CERN, 10.-14. November 2025

**DRD3 management (Ingrid, Sally, Michael, Gregor, Giulio, Roberta, Daniel)  
& WG/WP conveners**

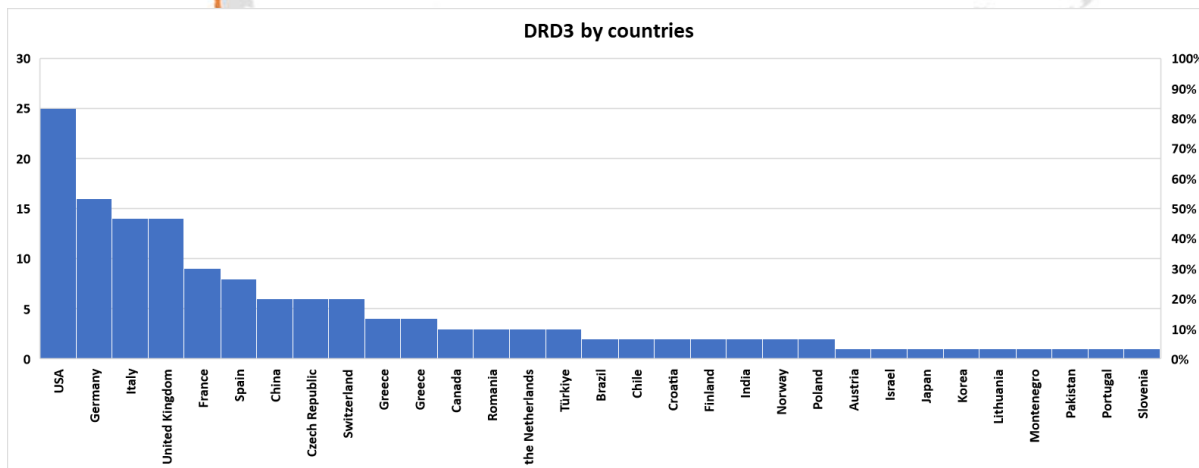

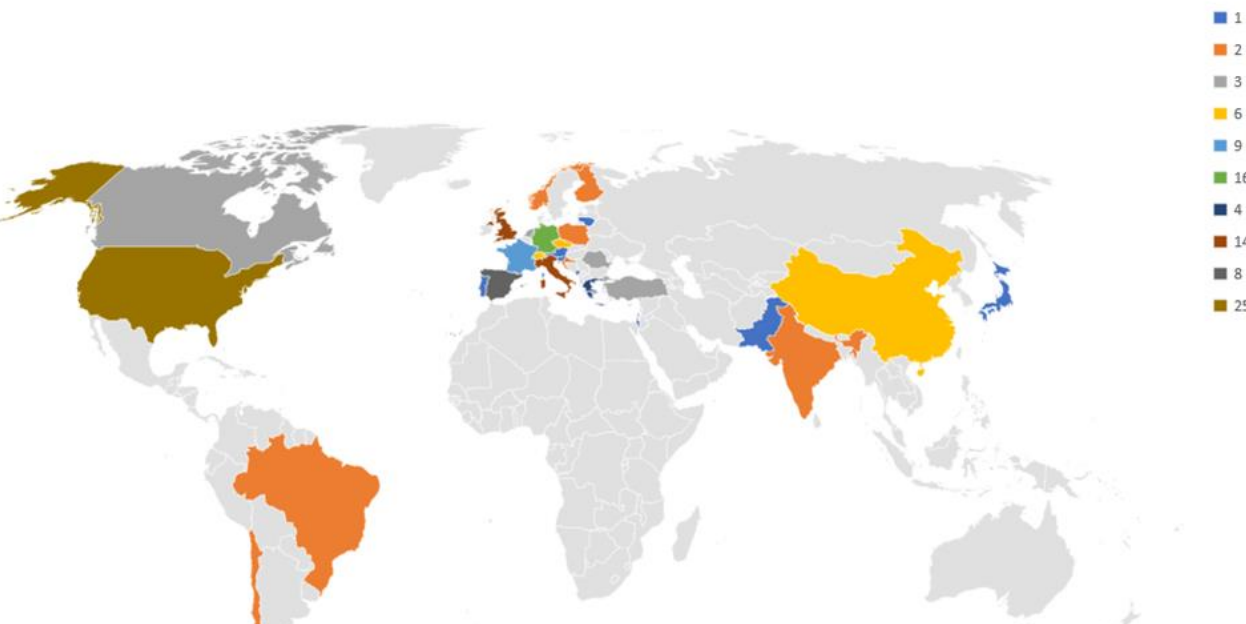

# DRD3 collaboration

# DRD3

148 institutions / 700++ people in the community e-group

Distribution of DRD3 members

Main events since the last DRD3 week:

- Lots of scientific meetings across many WGs
- **11 running WP projects in all WPs, several in preparation (work ongoing) – lots of interesting results will be presented**
- MoU is in final stages (WP projects in the tables – formalization of participation is more of problem)
  - still gathering final information and confirmation on how the groups will participate in what form
  - this takes more time than anticipated – but it is important that scientific work is progressing
- We have new institutes wanting to join us – it is a sign of recognition and relevance of the work.
- R&D work is ongoing in spite of large commitment of many groups to HL-LHC upgrades.

Bus transport (departure from Bldg. 39 –  
CERN hostel)

# Presentations – Projects/Scientific

- Constant number of contributions and constant attendance (actually record for in person participation), and also number of contributions - a positive sign
- Similar number of talks across the WGs as in the previous weeks

# Many thanks to....
