

Session Program

21-23 Nov 2011

RD51 mini week

WG2 - Physics issues

CERN

Monday 21 November

15:10

WG2 - Physics issues

Session | **Location:** CERN, IT Auditorium | **Conveners:** Maximilien Chefdeville, Harry Van Der Graaf

15:10–15:30

GridPix chip production in Bonn and NIKHEF 2012 test beam plans

Speaker

Harry Van Der Graaf

15:30–15:50

Results from the beam test of large area CsI-TGEM-based RICH prototype

Speaker

Vladimir Peskov

15:50–16:20

Coffee break

16:20–16:40

Studying the space resolution and the efficiency of resistive strips Micromegas

Speaker

Mr Marco Villa

16:40–17:00

Gain measurements of various GEM prototypes for CMS

Speakers

Laura Franconi, Michal Zientek

17:00–17:20

Ageing studies of Micromegas prototypes for the HL-LHC

Speaker

Javier Galan Lacarra

17:20–17:40

Preliminary results from the first operation of a 80x40cm² LEM in a double phase argon LEM-TPC

Speaker

Devis Orlando Lussi

18:40
