Academic Exchanges and Technological/Industrial Espionage of the KGB in the West During the Cold War

понеділок, 26 січня 2026 р. 16:35 (20 хвилин)

Concentrating on the KGB archival files, this paper analyses technological and industrial espionage of the KGB, which targeted mainly the American and Western European science and technology, providing the Ukrainian scientific centers and factories with the stolen “innovations” from America. The KGB used academic exchanges as a tool for technological espionage.
