

HEPiX Spring 2012 Workshop

Monday, April 23, 2012 - Friday, April 27, 2012

J. Heyrovsky Institute of Physical Chemistry

Scientific Program

Site Reports

Security & Networking

This track covers issues related to network technologies and associated monitoring tools, as well as network and system security.

Storage & Filesystems

This track discusses everything related to storage technologies and hardware and to file systems, in particular distributed file systems.

Grid, cloud and virtualization

This track is about grid services, cloud technologies and experiences and virtualization as an underlying technology for dynamic resource provisioning.

IT Infrastructure and Services

This track covers topics related to IT infrastructure and services. This includes : data center infrastructure, monitoring, email & web, virtualization for infrastructure consolidation

Business Continuity

An emerging topic during Vancouver's meeting, somewhat related to ITInfra track, that we'd like to discuss in more details in Prague. This track should cover ITIL matters related to IT services as well as subjects such as risk assessment and management, provision for service failover, etc.

Computing & Batch Services

This track is about computing technology evaluation, eg. benchmarking activities, GPU experiences, batch services...

Miscellaneous

If you have something that doesn't fit in any other track...

Vendor Presentations

Technical (non-marketing) presentations by vendors/sponsors
