

# WLCG Operations and Tools TEG Workshop

## Strategy and Goals

Maria Girone & Jeff Templon

12 December 2011

# Status

- Six weeks since kick-off dedicated to assess the **current situation**
  - All working groups have received input from sites, experiments and infrastructure providers
  - Documents on the twiki
  - Template available to guide the format of feedback by Wednesday
    - Done for WG1, WG3 and being done by WG2, WG4 and WG5
- The current situation has evolved over a number of years and has seen quite a few changes
  - Important to document and review inconsistencies, duplication and address issues

# How to Get to a Strategy

- This workshop we want to
  - Identify common patterns among issues raised
  - Identify possible strategies
  - Prioritize suggested changes
- Topical presentations to raise main issues and possible “individual” solutions
- Panels and Discussions to brainstorm on **common** solutions (across HEP and outside), strategies and priorities
  - the TEG itself documents strategies but does not provide or develop tools

# Additional Input on Priorities

- Discussions at the last MB have asked *“Operations TEG to provide a clear strategy on Availability Reporting which takes account of the needs of all the stakeholders (at least experiments, sites and funding agencies) and reduces the duplication which currently exists”*
- *“The Experiments agreed to continue their contributions in the Operations TEG who will provide an update at the GDB meeting on 14 Dec 2011”*

# Goals

- Revised operations and tools strategy should be valid throughout LS1 and beyond (2-5 years)
  - How can we reduce the overall level of operational effort in the future? (Ian Bird)
- Formal delivery of the document to be finalized at the F2F in Amsterdam 23<sup>rd</sup> January
  - Followed by the DM and Storage TEG F2F on 24<sup>th</sup> and 25<sup>th</sup> January
