

Micro Pattern Gas Detectors. Towards an R&D Collaboration.

Monday, 10 September 2007 - Tuesday, 11 September 2007

CERN

Scientific Programme

The programme will be divided in three parts:

Review of status and limitations of present micro pattern gas detectors including software tools and electronics.

Promising directions of common R&D.

Organizing an R&D collaboration.

State of the art in micro pattern gas detectors

Promising directions of common R&D

Forming an R&D collaboration
