

Session Program

10-11 Sept 2007

Micro Pattern Gas Detectors. Towards an R&D Collaboration.

Electronics for micropattern gas detectors

CERN, AB Auditorium Meyrin

Monday 10 September

17:00

Electronics for micropattern gas detectors

Session | **Location:** CERN, AB Auditorium Meyrin

17:00–17:20

Micro Pattern Gas Detectors characteristics and front-end electronics requirements

Speaker

Werner Riegler

17:20–17:40

MEDIPIX/TIMEPIX - Pixel electronics for MPGD

Speaker

Michael Campbell

17:40–18:00

Electronics for TPC readout with MPGD

Speaker

Luciano Musa

18:00–18:15

The AFTER-based MPGD-TPC readout electronics

Speaker

Pascal Baron

18:15–18:30

VFAT and discharge protection chip

Speaker

Walter Snoeys

18:30–18:50

Multichannel readout electronics for MPGD, based on different types of IDEAS chips

Speaker

Nail Malakhov

18:50–19:05

R&D on ASIC for GEM

Speaker

Giulietto Felici

19:05
