

Grid Interoperation

Stuart Purdie

QMUL Core Ops F2F 11th November

Covers ...

- **Issues arising cross administrative domains**

Administrative domains

- Sites

Administrative domains

- Sites
 - Except that's the whole point, shared with Ops Team, so leave that one to the side

Administrative domains

- Sites
 - Except that's the whole point, shared with Ops Team, so leave that one to the side
- NGI's

Administrative domains

- Sites
 - Except that's the whole point, shared with Ops Team, so leave that one to the side
- NGI's
- Projects

Administrative domains

- Sites
 - Except that's the whole point, shared with Ops Team, so leave that one to the side
- NGI's
- Projects
- Middlewares

EGI

- Strictly, EGI is not a different administrative domain
- It's a body for co-ordinating many (collections of sites)
- Fortnightly(ish) operations meetings

WLCG

- Strictly, WLCG also is not a different administrative domain
- It's a body for co-ordinating many (collection of VOs)
- Monthly operations meetings (GDB)
- Often similar to the EGI ops meetings
 - (Or is that vice-versa?)

EMI

- Middleware producers
- Mostly talked to via EGI OMB and WLCG
 - And GGUS!
- Not only within Grid Interoperability area

NGS

- ... So this gets complicated.

NGS

- ... So this gets complicated.
- The NGS VO
 - But that expects software availability in an odd way.

NGS

- ... So this gets complicated.
- The NGS VO
 - But that expects software availability in an odd way.
- And, err, that's it.

Current topics

- Will be mostly a list of problems

Current topics

- Will be mostly a list of problems
- EMI slacking off

Current topics

- Will be mostly a list of problems
- EMI slacking off
- Er ... that's it.
