

Invenio

Interface Utilisateur

CERN-UNESCO School on Digital Libraries
Dakar, Senegal, 21-25 November, 2011

Fonctionnalités

- Arbre de collections navigables
- Moteur de recherche puissant
- Métadonnées flexibles
- Affichage personnalisable des notices
- Fonctionnalités Web 2.0
 - Groupes
 - Reviews
 - Commentaires
 - Paniers
 - Alertes
- Circulation des livres
- Statistiques

BUGS

There are some things that are not working, and others that are rough around the edges, please report these bugs and we'll keep you updated on the fixes and improvements we make. We expect to be making a lot of updates and changes in the next few months, so please send feedback about the service to feedback@inspirebeta.net

The data in INSPIRE is updated daily and should be the same as what is available from SPIRES, or better. To correct data in INSPIRE (or SPIRES), let us know at help@inspirebeta.net

Les plusieurs façades de Invenio

The screenshot shows the Infoscience website interface. At the top left is the EPFL logo (ÉCOLE POLYTECHNIQUE FÉDÉRALE DE LAUSANNE) with language options for Français and English. The main header features the 'INFOSCIENCE' title and the subtitle 'LE PORTAIL D'INFORMATION SCIENTIFIQUE'. Below this is a breadcrumb trail: 'EPFL > infoscience'. The page is divided into several sections: 'MY ACTIONS' with links for 'Identification', 'Submit', 'Help', and 'Search tips'; 'WHAT'S YOUR PUBLISHER POLICY?' with a link to 'SHERPA/ROMEO'; a search area with a text input field, a dropdown menu set to 'any field', and a 'Search' button; 'Advanced Search' with two columns: 'Scientific production and competences (70,197)' and 'Documentary Resources (15,253)'; and a 'NEWS' section on the right containing three articles: 'Infoscience in the top-6 academic repositories in the July 2010 IR Ranking', 'Directive for Research Integrity', and 'Open Access: the support of the SNSF'. At the bottom left of the interface is a 'Powered by infoscience' logo.

Subject category	Computing and Computers		
Free keywords	Invenio ; CDS ; Very large digital library ; Log analysis ; User behavior study analysis		
Abstract	<p>The size of digital libraries is increasing, making navigation and access to information more challenging. Improving the system by observing the users' activities can help at providing better services to users of very large digital libraries. In this paper we explain how the Invenio open-source software, used by the CERN Document Server (CDS) allows fine grained logging of user behavior. In the first phase, the sequence of actions performed by users of CDS is captured, while in the second phase statistical data is calculated offline. This paper explains these two steps and the results. Although the analyzed system focuses on the high energy physics literature, the process could be applicable to other scientific communities, with and international, large user base.</p>

"See you soon" – a retrospective on the first LHC proton run

With the LHC already a week into the ion run, the CERN Bulletin takes the opportunity to look at the progress made by the experiments during the LHC's first proton run. In a series of interviews, the spokespersons from the five experiments take stock of the unprecedented success of the proton run. >>

Readers found the following reviews to be most helpful.

★★★★★ **A wonderful (and fun) guide to Common Lisp**

Reviewed by [tsj](#) on 14 Nov 2006, 17:48

0 out of 0 people found this review useful

(Test.) I've been recommending this text to people who want to start learning Common Lisp since it was first available in draft form on the author's web site. Now that it's out in print I can enthusiastically recommend that anybody who is interested in learning Common Lisp - or even curious about how the language can improve your productivity - purchase it.

Peter has a very enjoyable and easy-to-understand writing style, and he starts early with practical examples that show how Common Lisp can be used to solve problems. Chapter 3, "A Simple Database", is a great explanation of how programs are grown from pieces in Common Lisp to solve large problems. It's presented early and draws people in to the problem solving techniques used when programming in Lisp.
