Introduction to Economic Analysis Version 2.0

by

R. Preston McAfee

***J. Stanley Johnson Professor of
Business, Economics & Management***

California Institute of Technology

Begun: June 24, 2004

This Draft: July 24, 2006

This book presents introductory economics (“principles”) material using standard mathematical tools, including calculus. It is designed for a relatively sophisticated undergraduate who has not taken a basic university course in economics. It also contains the standard intermediate microeconomics material and some material that ought to be standard but is not. The book can easily serve as an intermediate microeconomics text. The focus of this book is on the conceptual tools and not on fluff. Most microeconomics texts are mostly fluff and the fluff market is exceedingly over-served by \$100+ texts. In contrast, this book reflects the approach actually adopted by the majority of economists for understanding economic activity. There are lots of

[Jonah N. Schupbach](#) (2011). [Studies in the Logic of Explanatory Power](#). Dissertation, University of California, San Diego

Human reasoning often involves explanation. In everyday affairs, people reason to hypotheses because they have been playing in my office because I judge that this hypothesis delivers a good explanation. This has relevance far beyond the commonplace. Indeed, explanatory reasoning plays an important role in many areas of science and philosophy.

The compression index of Bafoussam soils (Cameroon) and its correlation with soil properties
[J] [JP J. Solids Struct.](#) 2, No. 2, 191-202 (2008). ISSN [0973-5615](#)

Summary: The study of the compressibility of Bafoussam soils has been carried out. The compression index varies in the interval of 0.29 to 0.55. The study of the relationship between this index and the void ratio is permitted to prove significant correlations between this index and the void ratio. The values of the correlation coefficients are 0.76, 0.68 and 0.56, respectively. A model for determination of the compression index has been elaborated. This model can be used for the determination of the correlation coefficient.

High Energy Physics - Phenomenology

A General Four-Fermion Effective Lagrangian for Dirac Matter Interactions

Jean El Bachir Mendy (University Cheikh Anta Diop, Dakar, Senegal), Jan Govaerts (UC)

(Submitted on 31 Jul 2002)

Given the most general Lorentz invariant four-fermion effective interaction possible for two all possible 2-to-2 processes involving two neutrinos, whether Dirac or Majorana ones, analytic expressions are given for the associated differential cross-sections. Such a parametrization is used to study a Model of neutrino beam experiments which are in the design stage at neutrino factories.

Comments: To be published in the Proceedings of the Second International Workshop on Contemporary

Current trends in Rwanda's HIV/AIDS epidemic

E Kayirangwa, J Hanson, L Munyakazi, A Kabeja

Sex Transm Infect 2006;**82**(Suppl 1):i27-i31. doi:

Objective: To review the trajectory of Rwanda's HIV epidemic, including long term trends in HIV prevalence, markers of HIV incidence, and behavioural indicators.
Methods: This paper reviews the history of HIV serological and behavioural surveillance dating back to the early 1980s, synthesising findings from surveillance, research and programmatic data. The documentation reviewed includes published findings, conference abstracts, and unpublished analyses. Special emphasis is given to more recent sentinel surveillance data collected using known, documented methods. Recent trends in HIV prevalence were compared with data from participants in the three most recent consecutive rounds of antenatal clinic serosurveys.
Results: Early HIV surveillance in Rwanda documented high HIV prevalence in urban areas, which was widely disseminated into rural areas by 1986. Between 1988 and 1996, HIV pre

Let the data flow : OAI-PMH

1. OAI for Beginners: Overview

Contents of this part of *OAI for Beginners, the Open Archives Forum online tutorial*

- **How to use this tutorial**
- **Basic OAI concepts and features**
- **Seven key definitions**
- **Sources of further information**
- **Quick Quiz Questions**

How to use this tutorial

This tutorial is intended for those who are interested in more technical aspects of the OAI-PMH suitable for those who simply require some general background information. Each part builds glossary as required. In addition to the Glossary, you will find key terms defined within each picked up key points along the way.

Overview (this part) introduces the basic concepts underlying the OAI and the OAI-PMH. Use **Development of OAI-PMH** covers the emergence of the Open Archives Initiative, showing how it provide solutions. This part also surveys the development of the protocol (including the evolution of PMH v.2.0).

The rest of the tutorial contains more technical material. **The Main Technical Ideas of OAI-PMH** outlines implementation issues for Data Providers and Service Providers; it explains how to implement and several examples of freely available and adaptable tools for implementing a metadata set, including coverage of XML schema and how to support multiple record formats.

Basic OAI concepts and features

<http://www.openarchives.org>

The Problems

Two problems:

- End users were/are faced with multiple search interfaces making resource discovery harder.
- No out-of-the-box standard way for machines to explore resources

Cross Search?

- US Digital Library Experience suggests cross searching doesn't scale - $N > 100 = \text{bad!}$
- Collection description - knowing which target to use
- Query language and search attribute variation
- Rank merging problem
- Different size and type of target can skew results
- Performance - limited to slowest target
- Difficult to build a browse interface

SOLUTION: get all the metadata records in one place

Harvest (moissonnage)?

- Harvest records out of archives into one place
- OAI-PMH

So:

- $N = 1$ most of the time...
- One query language, set of search attributes and ranking algorithm
- An awareness of the data makes browse structures easier to build

Introduction

INASP works with partners to support global research communication through innovation, networking and capacity strengthening, focusing on the needs of developing and emerging countries.

We work with them to address their national priorities for:

- access to national and international scholarly information and knowledge
- use, creation, management and uptake of scholarly information and knowledge via appropriate ICTs

Partner Countries

Africa: Côte d'Ivoire; Ethiopia; Ghana; Kenya; Lesotho; Madagascar; Malawi; Mozambique; Rwanda; Tanzania; Uganda; Zambia; Zimbabwe

networking and

667 Journals
18,235 Issues
273,191 Articles
5,549,685 Citations

Initiatives: SciELO

- A model for cooperative electronic publishing of scientific journals on the Internet.
- Especially conceived to meet the scientific communication needs of developing countries, particularly Latin America and the Caribbean countries
- The SciELO model comprises integrated procedures for the measurement of usage and impact of scientific journals.
- <http://www.scielo.org>

Initiatives: Medknow

Medknow statistically
136 Total journals
122 Total associations / societies
55,960 Total articles
47,222 Full text articles
25,700 Manuscripts submitted in '10
2,001,467 Articles downloaded in Oct '10

- A publisher for over 80 academic and scientific journals, offering both online+print open access journals
- Pioneers in 'fee-less-free' model of open access publishing
- Medknow has successfully put in place a manuscript submission and peer review system which has resulted in considerable decrease in the submission to decision (turnaround) time.
- Most of the journals published by Medknow are archived at multiple places included OAI-compliant e-print repositories (<http://bioline.utsc.utoronto.ca/>) and sites such as Bioline International (<http://www.bioline.org.br>). Content of the Medknow journals is also available for harvesting from <http://www.medknow.com/oai2/>. Thus, ensuring the long term archiving and accessibility of the published content.
- <http://www.medknow.com/>

Initiatives: Bioline

- A not-for-profit scholarly publishing cooperative committed to providing open access to quality research journals published in developing countries (currently from Bangladesh, Brazil, Chile, China, Colombia, Egypt, Ghana, India, Iran, Kenya, Malaysia, Nigeria, Tanzania, Turkey, Uganda and Venezuela).
- Aims at reducing the South to North knowledge gap.
- By providing a platform for the distribution of peer-reviewed journals BI helps to reduce the global knowledge divide by making bioscience information generated in these countries available to the international research community world-wide.
- <http://www.bioline.org.br>
