Do we really need an upgrade of the collimation system for HL-LHC?

Friday 10 February 2012 08:55 (20 minutes)

Several improvements are foreseen for the collimation system during the LS1. The talk will discuss how the new performance level compares with the HL-LHC needs and if further improvements will be needed to be compatible with the high luminosity operations expected for the HL-LHC upgrade .

Presenter: REDAELLI, Stefano (CERN)

Session Classification: S09 -LHC related projects and studies –Part(II)
