## **New Magnets for the IR: how far are we from HL-LHC target?**

*Friday 10 February 2012 09:20 (20 minutes)*

The HL-LHC will benefit from new magnet technology (large aperture, Nb<sub>3</sub>Sn conductors) already under advanced R&D programs. The talk will review the status and roadmap of the new magnets for the high luminosity interaction regions.

**Presenter:** SABBI, Gianluca (LBNL)

**Session Classification:** S09 -LHC related projects and studies –Part(II)
