Magnet R&D for LHeC and HE-LHC: synergy and competition?

Friday 10 February 2012 11:05 (20 minutes)

The new projects heavily rely on new magnet systems. The talk will illustrate the magnet R&D program for the LHeC (accelerator, transfer lines, kickers, interaction regions) and the HE-LHC (main Ring, SPS+, transfer lines, kickers). In particular synergies or parallel roadmaps will be highlighted together with the first steps foreseen for 2012.

Presenter: BOTTURA, Luca (CERN)

Session Classification: S09 -LHC related projects and studies –Part(II)
