SC Cavities R&D for LHeC an HE-LHC

Friday 10 February 2012 11:30 (20 minutes)

The new machines HE-LHC and LHeC (whether or not linac-ring and ring-ring options will be favored) rely on new RF systems. The talk will analyze the synergies or competitions between the R&D strategies. The first steps foreseen for 2012 will be highlighted.

Presenter: JENSEN, Erk (CERN)

Session Classification: S09 -LHC related projects and studies –Part(II)
