## **Access strategy in the accelerator complex and experimental areas**

*Wednesday 8 February 2012 18:35 (15 minutes)*

This paper shall review the main features of the new PS Personnel Protection System (PSPSS) as well as the main milestones for its deployment during the Long Shutdown of 2013-2014. Access conditions in the PS, SPS and LHC complexes during this period shall be described as well as the upgrades and improvements that are under preparation.

**Presenter:** NUNES, Rui (CERN)
