Performance Reach in the LHC for 2012

Tuesday 7 February 2012 18:30 (20 minutes)

Based on the 2011 experience and Machine Development study results the performance reach of the of the LHC with 25 and 50 ns beams will be addressed for operation at 3.5 and 4 TeV. The possible scrubbing scenarios and potential intensity limitations resulting from vacuum, heating will be taken into account wherever possible.

Presenter: ARDUINI, Gianluigi (CERN)

Session Classification: S04 - Strategy for 2012 (II)
