

Session Program

8-9 Jun 2026

Low Density Materials for Particle Accelerator Applications

Session 2A

University of Bath 10W 2.45

Monday 8 June

13:30

Session 2A: Current and potential capabilities for production and treatment

Session | **Location:** University of Bath 10W 2.45 | **Convener:** Philippe Poulin

13:30-14:00

CNT fibre production - state-of-the-art

Speaker

Matteo Pasquali

14:00-14:30

CNT based materials production synthesis

Speaker

James Elliott

14:30-15:00

Thermal properties of large-scale CNT fiber structures

Speaker

Yoku Inoue

15:00
