

# Status of GFAL/lcg-util

*Remi Mollon, CERN*

*Data Management Team*

*JRA1 All-Hands Meeting*

*25<sup>th</sup> October 2007*

- **In production**
  - GFAL 1.9.3-1
  - lcg-util 1.5.2-1
- **Upcoming versions**
  - GFAL 1.10.x
  - lcg-util 1.6.x
  - Testing/certifying phase is long due to a lot of changes

- **A lot of bug fixes**
- **Uses gSOAP 2.7.6b instead of 2.6.2**
- **New gfal\_\* functions for transparent use of SRM functions**
  - gfal\_get(status)
    - SRMv1: get, getRequestStatus
    - SRMv2: PrepareToGet, StatusOfGetRequest
  - gfal\_prestage(status)
    - SRMv1: not supported
      - *not so transparent, simulate it by “get” ?*
    - SRMv2: BringOnline, StatusOfBringOnlineRequest

- gfal\_pin
  - SRMv1: not supported (?)
  - SRMv2: ExtendFileLifeTime
- gfal\_release
  - SRMv1: setFileStatus (done)
  - SRMv2: ReleaseFiles
- gfal\_ls
  - SRMv1: getFileMetaData
  - SRMv2: Ls

- **Possibility to not make request to BDII**
- **Possibility to specify the type of SE to use**
  - mandatory when “no\_bdii” set
  - else optional
- **Python interface to main functions**
- **New `gfal_version` function to get the GFAL version number**

- **New commands**
  - lcg-ls – lists files on LFC or SEs
  - lcg-geturls – same as lcg-gt but on several URLs
- **Possibility to not make request to BDII**
- **Possibility to specify the type of SE to use**
  - mandatory when “no\_bdii” set
  - else optional
- **Python interface to main functions**
- **New “--version” option to all lcg-\* commands to get GFAL and lcg-util version number**

- **Mid term (1<sup>st</sup> quarter 2008)**
  - Renaming of all functions with a specific prefix to avoid clashes with other libraries
  - Extract VO name from proxy if “--vo” option is not specified
  - thread-safe version of GFAL and lcg-util
