Enabling Grids for E-sciencE

- **Java**
  - Log4j – Security and UK components
  - Can we now decide upon log4j?

- **C++**
  - Log4cpp – WMS but hidden by macros so easy to change
  - Log4cxx has reported problems with too many dependencies
  - Can we now decide upon log4cpp?

- **C**
  - ??? – VOMS and L&B
  - Can we presume that L&B will come up with a solution?
