

## **SRF Cryomodule Construction and Photocathode Prototyping at AES**

*Friday 11 May 2012 10:00 (30 minutes)*

Current activities by AES in the construction of single-cell 500 MHz SRF cryomodules for NSLS-II will be discussed as well as aspects of the prototyping of a BNL/AES SRF electron gun designed for 500 mA average beam current.
