

# Joint meeting of the High Energy Particle Physics and Astro-Particle Physics groups of the Institute of Physics

2nd to 4th April 2012

# Practical Information: In case of fire

- The muster point in case of a fire alarm is in the library square just outside this building.

## Practical Information: Wifi & assistance

- Use eduroam if you have registered for this service before leaving your home institute.
- Otherwise see the registration desk for details about a QM-College-WiFi account.
- If you need help, ask a local. We have the QMUL logo on our name badge:

## Practical Information: recording

- We aim to record some of the talks in this (the first) plenary session that we think may be of more general interest.
  - Communicating Our Science (Dr. B. Still)
  - Early Cosmic Rays (Prof. D. Perkins)
- The intention is to put this on the web for wider access.

# Practical Information: Reception

- This evening's welcome reception is on the first floor of the Queens Building:

Enter from the front of the building.

## Poster Sessions

- We have elongated breaks over lunch so that you can enjoy the poster contributions to the meeting.
  - 2<sup>nd</sup> half of each lunch break serves as the poster session.
  - If you've not done so already, contributors should put their posters up this afternoon (see the registration desk for assistance).

- Please take time to visit the exhibition where you will see

**IOP** Publishing

**GridPP**  
UK Computing for Particle Physics

(Outreach activities supported by STFC are participating in the exhibition)

- We are grateful for the generous support of the following sponsors for this meeting

**IOP** | Institute of Physics  
**Astroparticle Physics Group**

**IOP** | Institute of Physics  
**High Energy Particle  
Physics Group**
