

New structures:

3d. A new mask with some improvement is under investigation:

- Different p-stop
- Slim edges 100um, 50um.....
- Smaller holes, is it necessary?
- N-n technology?

Multiplication:

New run in production at CNM, first project financed by rd50 did not show clear results.

Design of new strips with multiplication effect?

Low R strips

Fabrication run started at cnm. Rd50 project.

Slim edges:

NRI new observer of rd50

Rd50 project in collaboration with many partners.

Pixel and strips detectors.
