FTS 2

- FTS 2.2.8 pilot run complete
- Message publishing working
- EMI release underway (EMI-I/SL5/x86_64)
 - Hope for 16th Feb
- What interest is there in the gLite release?
 - Nb technically gLite support ends April.

- Working now on Prototype 1
 - Concentrating on webservice (transfer management and configurate) + clients and abstract db interface
 - Would like to establish fts-steering list
 - Exchange of ideas between developers and stakeholders
 - We have to finalise many decisions in the next few months:
 - First issues to discuss are configuration model and state machine

- **FTS 2.2.5**
