AII discussions

Tuesday 20 March 2012 14:00 (20 minutes)

AII has seen a lot of activity lately. As a consequence, its code quality has dropped, and yet there are use cases that are not fully addressed.

I'd like to discuss:

- 1) Further needs in the community for AII (new plugins, extensions to existing ones).
- 2) A plan on which parts need to be refactored.
