

# ROOT and Simulation Software

Christoph Blume, University of Frankfurt  
NA49 Collaboration Meeting  
5.10. – 8.10. 2003

# ROOT49

- Software changes:
  - TRootDS: Copying of MTV0 V0s and Xis included for p+p data
  - TRootDSMC: Small bug fixes provided by Marco
- Pending new software:
  - T49EventPlane (Alexander)
  - Acceptance description for fluctuation analyses (Jacek)
- Mini-DSTs copies, provided by Christopher Alt:
  - 20 AGeV production 03A
  - 158 AGeV p+p production 00R with Xis included

# Simulation Chain

- New expert: Robert Korus (Kielce)
- Documentation webpages, see Roberts talk
- News and changes:
  - Geometry (V02A) and setup files for 30 AGeV data
  - Final update of MC reconstruction script still pending
    - Distortions in p+p case
    - Different options of reconstruction chain
