

V+HF Discussion Topics

- Common ATLAS/CMS definition of observables.
- Define common fiducial volumes to extrapolate between ATLAS/CMS phase spaces.
- Definition of the B-hadrons:
 - impact of min p_T cut ?
 - infrared safe ?
- Treatment of MPI ?
- Consistent approach of assessing the model dependence uncertainties in the unfolding/parton-to-hadron corrections.
- Common approach for studying impact of hadronisation/fragmentation/decay.
- Experimentally: feasibility of double b-tagging ?
